

Raymond Recorder

VOLUME 35

FRIDAY JUNE 12 1912

NUMBER 7

School Grounds

Greatly Improved

The past few months have witnessed a decided improvement in the grounds at the High School. Old trees, which had outgrown their usefulness, around the lot have been removed, cement walks in three directions have replaced the old trails which had been worn by thousands of feet as people trudged back and forth on them, and on Monday, after the land was filled and levelled with drift dirt, lawns were planted across the entire front of the school.

The School Board and staff are to be complimented for the fine work done, and with the co-operation and help of the students, though possibly not always willingly, the school and grounds will have a much improved appearance. If the accepted psychology proves true, the improvement in the appearance of the grounds, should reflect itself in the improved deportment, appearance and general attitude of the students, and if so then the investment in outward improvement will yield really big dividends to everyone concerned.

Our congratulations to all concerned in the program.

J.W. Evans was in Magrath in the course of his work as Feldman on Tuesday.

DAN E. CAMERON

Talks Producer at CBC's Prairie Region Headquarters in Winnipeg, whose interest in radio developed as a result of ten years teaching experience in rural Saskatchewan, where he saw what immense educational possibilities there were in radio. In Winnipeg Mr. Cameron has charge of talks generally, which are heard over station CBK Watrous (540 Kc.)

Municipal Council Meeting

The Municipal Council met in their regular monthly meeting Tuesday of this week with all members of the Council present.

The resignation of Secretary O. H. Snow, to become effective the end of June was accepted with regrets D. M. Halliday, who has been in the office as assistant Secretary for the past three months, was appointed Secretary in Mr. Snow's stead.

The Council agreed to allow a 5 p.c. discount on current taxes paid on or before December 1st. A Mother's Allowance was passed.

Another large Caterpillar engine has been purchased by the Council and is out on the road at work now. The payroll was passed and ordered paid and the meeting adjourned.

CONJOINT IN THE 2ND WARD

Throughout the L.D.S. Church in more than 1,000 wards last Sunday night, the M Men and Gleaner Girls of the Church had charge of the program, and furnished most of the numbers. In the 2nd Ward the following program numbers were given with Monte Palmer in charge:

Opening songs "True to the Faith" "Carry On" & "Choose the Right." Opening prayer by Alma Smith of the M Men group.

A Message from the General Presidency of the Y. M. and Y. W. M. I. A. was read by Miss Janet Dahl of the Gleaner Girl group.

Monte Palmer played a Clarinet solo followed by a retold story by Miss Vivian Scoville.

Gordon Scoville and Gordon Anderson of the M Men Group then read messages in support of the L.D.S. Word of Wisdom from the King Sisters, noted radio singers, Gene Tunney, former world's heavyweight champion boxer, Sonja Heinie, the famous Norwegian skater, Henry Ford the motor car magnate and Roger Babson the world famed statistician.

Reg Kessler, home from the services on leave spoke briefly and encouraged the young people to carry on and live the teachings of the Gospel.

Elder John Allen, Stake Pres. of the Y. M. M. I. A. gave a very interesting talk on "It Pays to be Good."

The closing song was "Do What is Right" and the benediction was pronounced by Miss June May.

NEWS NOTES

Ke. Blair of the Mid West Paper Sales Co. was a Raymond visitor Monday.

Because of high water from the steady rains highways thru the Crow's Nest Pass were closed again Saturday.

George Thompson has all the framework up on his new house and is busy now putting on the siding.

Ilyrum Fromm left Tuesday for Calgary and from there will travel to Vancouver and then down the Pacific Coast to California.

E. S. Heninger was busy Monday laying a line of drain tile from his house to the tile drain of the Town on Broadway. The heavy rains have flooded basements and cellars and drainage is quite a problem right now.

The streets were very quiet Monday. Whenever our banks and offices have a holiday, the Town is so quiet you can almost hear your hair grow, and the rest of us might just about as well holiday too.

Mrs. Marion Tolstrup returned home from Hospital this week and is recuperating after a serious operation. The operation was successful and her progress to date has been a source of satisfaction to her many friends.

Thursday's rain has put a stop again to all field work. Gardens are slow and some have been drowned out. Cucumbers so far hold poor promise. Wheat seeding was not finished, and this acreage will likely go into coarse grains.

Are You Thinking Hospital

We are of course not saying anything new, when we remind our readers that efforts are in progress to obtain a Hospital for Raymond. The Committee is constantly in communication with authorities in Edmonton on this matter and are assembling facts and figures from other successful units to have on file when our own proposition gets to the point where these things are needed.

Now, we feel we might ask, "What are you doing?" Are you thinking and talking hospital? Are you fully converted to the idea, and are you weighing the pros and cons honestly? Or are you letting others do your thinking for you and are you being swayed by every wind of doctrine with respect to this vital and valuable community need? There is a definite responsibility in this matter for everyone of us, and we should be thinking and making up our mind as to our individual stand on the question.

Weldon't think any more need be said than has been said regarding the need for and the benefits that a Hospital would bring to us, and we are not thinking so much of the dollars and cents benefits as we are the improvement in the health of the community generally, the facilities that would be afforded of keeping our mother and babes at home at the time of confinement, the ability to care for accidents such as broken bones, all kinds of operations and illnesses, and so on without the trip to Lethbridge; and also the facilities for our aged and broken in health people going there for a rest cure when we at home are too busy or too poor to provide what they need and are entitled to in the way of trained care and diet.

We see red when we hear people talk against the idea of a Hospital. When for the sake of an extra dollar or two in

to hear men berate the idea of a Municipal Hospital and the community value that it would bring, we wonder if these individuals have any of the milk of human kindness in them or if they are worshippers of the dollar and the peace and security that they think it will bring. Every community improvement is bought at the price of sacrifice on someone's part either in money or time or both. But in the roster of remembered citizens in any community who are honored and respected by their friends and neighbors, it is not the man who died with the highest bank account, it is the man and the women who had time to assist, and who were willing to sacrifice a little, that their community might be better because of their having lived there.

The time is ripe and the opportunity is here for us to obtain a Hospital and reap its benefits. We have turned down similar opportunities in the past when we might have benefited greatly by having embraced them. However, that is water under the bridge. The question now is, what will we do with the chance that is ours today? If every citizen puts pressure on the Town and Municipal Council, and creates a Hospital conscious attitude for a little while, there is no question of the outcome. If we relax and expect one or two to mould the opinion of the community, and to present to us all cut and dried, our Municipal Hospital, we will more than likely be disappointed.

Think Hospital, talk Hospital, ask questions about it and when you are talking with your neighbor boost it, and we will achieve our goal. Public sentiment is the push that usually spells success or failure for the under takers. Let's get our Hospital NOW.

NEWS NOTES

Ira McBride was busy Tuesday morning laying some new linoleum in the local Red Cross rooms.

We are informed that both Ted Meeks and T. T. Mendenhall are making some alterations and improvements to their homes in the south part of town.

The bus was well loaded both coming and going to Magrath on Tuesday with Relief Society Ladies who were here for the Stake Relief Society Conference.

Bishop and Mrs. Harold Wood of Taber were Raymond visitors Tuesday, when Mrs. Wood attended the Relief Society Conference.

The Stake Choir, numbering 40, in nine cars, travelled to Cardston Sunday night to provide the singing for the joint Conjoint M.I.A. Service of the two wards. A very enjoyable trip is reported and after the service the Raymond people all were served a delicious lunch by the M.I.A. officers. The M Men and Gleaners had charge of the meeting, presenting the same program as was presented through the Church.

Mr. and Mrs. Ervin Judd are visitors in Raymond and are guests at the J. F. Judd home.

Fred Piegras left on the bus Saturday morning for Portland, to attend the funeral of his brother, J. M. Piegras, aged 65, who passed away there, Friday. He will return early next week.

The road into the M. D. office and a parking space around the door has been heavily gravelled this week. This will make a fine improvement as this has been very muddy in wet weather in the past.

Rain commenced falling again Thursday morning and puddles were standing on the ground by 9 a.m. Work in fields in the ridge country had just started again after a 2 inch downpour Sunday night, and will be stopped again for some days.

Paul Schneider took a load of scrap iron into Lethbridge Monday morning. Paul said "I didn't realize we had so much. I believe if every farmer would gather up his scrap iron, he would really be surprised at how much could be gathered up."

School Board Hold Regular Meeting

NEWS NOTES

Alf Strate of Cardston was a visitor here Tuesday.

Mesdames F. R. Taylor and A. H. Zabriskie are on a visit to Utah with relatives and friends.

Owen Larson is commencing to put the siding on his addition to his home. The framework has been up for some time.

Messrs. J. A. C. Stewart and D. K. Anderson of the Bruce-Robinson Electric, Calgary, were business visitors in Raymond on Tuesday.

Our local Golf Course is reported in splendid condition now with the greens excellent and the fairways recently mowed and cleaned up. Our local Bobby Jones' of which we have quite a number are getting in their tees and really reporting some good scores.

Mrs. Rowena Hicken Low, of Richfield, Utah, is visiting here with her parents and other relatives. She arrived last week. She will return to her home the last of this month. Her two younger girls are with her, and her oldest daughter is a nurse in training in a hospital in Salt Lake City.

Town Council Meeting

Regular Town Council meeting was held Monday and Tuesday evenings, the most of the time of the regular session Monday evening being occupied with delegations.

The Cheese Factory Committee was present asking for two lots for the factory site and those were granted. Respect ing drainage the Council would assume no responsibility on this score. A period of non taxation was asked but the Council could not grant this, but agreed to a tax of half the assessed valuation of the plant for 10 years if the Utilities Board agreed.

The Raymond Irrigation District was represented regarding details of the new water system for the Town in exchange for irrigation privileges at the big dam in the Alfred Coulee. The Town and District came to an agreement, which has only to be ratified now by the P.F.R.A. when work will commence.

A request was read to have the L. Brandley property removed from the Town borders, but the Council was not in favor of this move. A complaint was received from the Alberta Government Telephone re the wilful destruction of insulators on the phone line east and north of town. \$45 damage, besides the time of a man and gas and oil for his car was reported on the east line, and 175 insulators had to be replaced out north. The Government asked for the co-operation of the Council in curbing this destruction, which is bad at any time, but is inexcusable in war time. Drastic action will be taken against offenders who

Two Mother's Allowances were discontinued, the youngest child having become over the pension age, and one Old Age pension was allowed. The Swimming Pool will officially open very shortly, although no caretaker has been appointed as yet.

The Raymond School Board met in regular sessions Tuesday evening, and after a lengthy session adjourned to Wednesday night, the main business of the Wednesday evening session being a discussion and decision of their program of installing rest rooms at the High School during the summer holidays.

At the meeting Tuesday evening the question of schooling for the Japanese children, recently arrived from the Coast was discussed some, and the Board reaffirmed their decision to accept it. Locally, 115 are registered, which does not represent all those of school age and this would demand at least three additional rooms, which in Raymond's case would mean another building. The Board have no intention of accepting this responsibility.

Inspector's reports were discussed, and the schools were carrying on satisfactorily in all respects. Teachers and contracts for the coming year were discussed some, and outside of two or three known resignations, no changes are expected. Playgrounds for the Public School are being studied and effort is being made to convert the open ground back of the Capitol Theatre, and also the vacant lot on the west side of the street into added playgrounds when the west lot can be reclaimed.

The month's accumulation of bills were passed and ordered paid.

NEWS NOTES

G. Hildon Gibb, at present at Kananaskis Camp, was in Raymond over the week-end.

Clark Lund was here on Tuesday from Skiff. While here, with the Stampede Committee they were working out some of the details of the coming Stampede.

L. L. Pack is home again from Salmon, Utah, where he went to attend funeral services for his sister. He made the trip both ways by Western Air Lines from Lethbridge.

June 29th to July 5th is "Army Week" across Canada, when Canadians are asked to show their appreciation for the men and women in the service. What are we in Raymond going

yet. Some additions to dressing rooms may be made this season.

A representative of the War Time Prices and Trade Board had been in Town re retail Milk Prices and the recommendation was made that the retail price be raised to 11c. instead of 10c. per quart, and that the wholesale price be 10c. The Council agreed to this recommendation which had been made after investigation of local conditions.

An application was received for a Grocery Store License for a Japanese resident, but because of the Dominion Government's ruling regarding these people it could not be granted.

The Cash report was presented and the payroll was passed and ordered paid.

TOO MUCH DIFFERENCE THE CONSTITUTION of the

United States is built upon the basis that all men are created equal. Now, all men are not equal. No sensible person will argue that. Some have more brains than others, some more energy, some more perseverance, some more insight.

Nevertheless the margin between the ablest and the least capable is not so great as the salaries of the fortunate would indicate. Eugene Grace, president of Bethlehem Steel, received a salary of \$776,000 in 1940. J. W. McCoy, vice-president of the DuPont Corporation, got much less—only \$213,000 in 1940. Charles Wilson, executive vice president of General Electric, had to get along on only \$135,000 in 1940.

That is the sort of stuff that makes the multitude "red-eyed." That is why there is much agitation in the ranks of labor and agriculture. But the "Business Bourbons" will cling to their large salaries if (and until) their word topples.—Brooks Bulletin.

DAD, GIVE US SOMETHING TO COME BACK TO

Dear Dad:
I've read your letters with interest, and followed the newspapers with hope, yet nowhere do I see a sign of the spirit I hope to see this war bring out.

Dad, even you seem to overlook one factor. You ask for my ideas on what organization might do.

I wish I spoke for every soldier here. Here's what your U.S.O. officer now—I pray I speak for a Y. M. C. A. and Y. M. H. A. and all the rest can do.

They can give me a living thing to fight for. They can

attend Democracy behind the lines while we defend it from the fore. They can give me and every thinking man with a gun, whose only excuse for murder is the defense of his home and his government, a real government to defend. And they can give us something to come back to besides a melange of poverty and plenty with the accent on the former.

I don't want free cigarettes or a carte blanche to heroic suicide. I want a real democracy to return to, not an ideal behind which hides 40 million underprivileged citizens, a host of crooked politicians and a mass of factions each striving to cut the other's throats.

Don't remind me of Valley Forge, Gettysburg, the Maine, the Alamo. Democracy lives in the tomorrow, not yesterday.

Don't tell the sharecropper to forget his rickets, his debts, the blank future, and be happy because one hundred years ago Old Ironsides won a battle in the Mediterranean.

Too many men have died for an ideal that never was. I don't want to join their ranks.

I haven't had a chance to think it all out and I've expressed it poorly, but you know what I mean.

Love,
Jim.

Editor's Note: An authentic letter by a private, read at a New York meeting by Professor Theresa Wolfson, of the Department of Economics, Brooklyn College, and reprinted in "The Call."—Wheat Pool Budget.

WOMEN AND NEWSPAPER

Harry Corkum says that women and newspapers are much alike, because—

They have forms;
They always have the last word.

Back numbers are not in demand.

They are well worth looking over.

They have a great deal of influence.

You cannot believe everything they say.

They carry the news where ever they go.

Everyman should have one of his own, and not borrow his neighbors.—Bridgewater Bulletin.

WEEKLY LETTER

REPAIR HAVING AND INVESTING MACHINERY NOW

The need of metals for war purposes will greatly reduce the number of new machines that can be made so it will be necessary to use the old machines longer. For that reason it is especially desirable to repair machines before their season for use arrives. More repair parts will be manufactured this year than in the past but there will be greater demand. It is well, therefore, to check over the machines early and order the parts required. This is the best way to ensure having repair parts can be ordered now.

Perhaps there is no better suggestion that can be made at this time regarding machinery than to carefully inspect mowers, tractors, combines, binders,

and threshing machines, so that part can be ordered now.

Also, it would see a wise procedure to decide as to additional machines that are required for the harvest. Those who wait to purchase their machines just before the crop is ready to harvest may find that they cannot be secured. If new machines are not available, it may be possible to purchase used machines if there is sufficient time to find them. This suggests the thought that those who have used machines for sale or trade should advertise the fact at once.

Farmers who are accustomed to having their combining and threshing done by others would do well to make their arrangements as early as possible.

The entire machinery situation demands considerable forethought and preparation if inconvenience and loss are to be avoided.

SAVE YOUR VITAMINS

Saving vitamins is one of the important things, that housewives must look to in preparing food, states Vera D. Richards, of the Agricultural Extension Service.

Women everywhere are waging a war on waste and they are well aware of the importance of saving food—but it is every bit as important to save food values. The minerals and vitamins that give us sturdier nerves, better appetite, more pep and a cheery outlook on life are too valuable to neglect or pour down the sink. There's no saving very complicated in saving them in a well balanced proportion if you keep the following tips in mind:

1. Remember that exposure to heat, air and liquid tend to destroy some vitamins so cook vegetables particularly, as quickly as possible in covered pans and with the least amount of water possible.

2. Baking in the skin or steaming saves more food value than boiling.

3. Pare vegetables thinly, never leave to soak in water, and drop into boiling, not cold water.

4. Add the salt just a minute before taking off or even after—cooking vegetables with salt increases loss of important minerals into the water.

5. Save vegetable water for gravies, soups and sauces.

6. Soda destroys Vitamin C. (cream of tomato soup can be made fit with soda—add cold tomato to warm milk, heat over fire and do not allow to boil. Serve immediately.)

7. Cook only enough vegetables for a meal—reheating means greater loss of food values.

Young beet greens, turnip greens, dandelion leaves and lamb's quarters are tasty and rich sources of iron and vitamins.

A WORD FOR THE HORSE

(Stettler Independent)

A man said to me one day at a Horse Sale that the directors of the sale were trying to bolster up a vanishing industry. The trouble was that he saw all the automobiles in town on Saturday and he thought that the horse had passed out. But the horse will never pass out in agricultural Alberta. In 1905 there were 12,257 horses on our range. In 1914 these had increased to 520,000 and in 1920 we reached the peak at 800,000 horses. Then came tractors and combines but we still have over 700,000 horses on the farms of the province, worth over \$10,000,000.00. Is that a vanishing industry?

I make the statement that many farmers would have been years ahead in their farm operations if they had stayed with horses exclusively as they could have raised enough wheat by horse power for the world's markets, and our livestock industry would have been built on a solid foundation.

UNDER THE "BOMBER'S MOON"

Will the moon be shining tonight? If so, will it be bright and full, or perhaps just a slender crescent in the sky? Ask the average Londoner these questions and the chances are he would reply accurately, and without any hesitation. For the moon is the only light which shines in the blackout.

Early in the war an enterprising printer, capitalizing this fact, produced a rapid calculator which showed whether the night would be moonlit. The original idea was that one could arrange his evenings out when the moon was shining and stay home on moonless nights.

But when the Blitz on London

All Thru the Night

As we rest at the end of a weary day,
While the evening shadow falls;
Our hearts are filled with a peaceful joy,
We hear the night bird's call.

We hear the whispering of gentle breezes,
Which are dancing every where,
The world is steeped in a silent mood,
O'er cast with a tranquil air.

All nature's children have turned to slumber,
But in the star studded sky;
The man in the moon, with his solemn air,
Keeps watch with his huge round eye.

Then the King of day with his forces bold,
Takes charge from the King of night;
And the sun against the azure sky,
Is truly a wondrous sight.

NEW COATING FOR MILK CANS FOUND

Dairymen in all parts of
Canada have been showing
growing concern over the short-
age of cans for evaporated and
condensed milk, and cans for
shipping milk and cream. Diffi-
culty of obtaining tin for
coating the cans is the chief
cause of the shortage and a
new material which may elimi-
nate much of the need for tin has
been developed by Paul D. Wat-
son, chemist in the U. S. bureau
of dairy industry.

The new coating material is
made largely of lactic acid and
vegetable oil and preliminary
tests are promising. The ingredi-
ents are readily obtainable, pre-
sent little difficulty in applica-
tion, and the material does not
impart flavor to the contents of
the can.

Tests are now under way with
ordinary 5 and 10 gallon milk
cans made of steel, coated with
the new lacquer inside and out.
Subjected to the equivalent of
a month's hard wear and tear in
an average dairy plant, cans
thus coated have resisted all de-
structive effects of water, steam
and alkaline solutions ordinarily
used in washing dairy utensils.
The only effect so far appears to

be a tendency for the lacquered
surface to wear thin on the neck
of the lid and in the throat of
the can. These areas where the
wear is greatest may have to be
coated with tin and the lacquer
used on the rest of the can only.
Cans are now being so treated
to test this possibility.

SINGLE CAR PLATE PLAN FOR ALBERTA

Alberta motorists may carry
one instead of two number plates
on their cars next year.

An amendment to the Vehicle
and Highway Traffic Act
which has been introduced in
the legislature gives the provin-
cial secretary (Hon. E. C. Mann-
ing) authority to authorize the
issue of a single number plate

leamed expedient.
This action has been taken in
view of the expectation that
owing to war conditions, there
will be considerable difficulty
in obtaining metal for number
plates.

The marker may be a plastic
or any other material which
may be secured while the form
design and manner of display
will be covered by regulations.

Some other provinces this
year adopted the single number
plate plan, according to officials
of the Alberta Motor Associat-
ion.

Adopting of the single license
plan will be discussed at the
midsummer meeting of direct-
ors of the A.M.A.

Leo, Hancock was home on
short leave this week from King-
ston, Ontario. He is looking fine.

SERVICE STATIONS & TIRE DEALERS WILL ACCEPT SCRAP RUBBER

Canada's Need For Rubber
Stressed By Munitions And
Supply Department

According to a circular issued by the Department of Munitions and Supply and received locally in the past week, the various oil companies and their companies throughout Canada have offered the use of all their stations as receiving depots for scrap rubber. These companies and their dealers, the latter states, are giving this service purely from patriotic motives and without any financial returns.

All the rubber received by them will be turned over to local National Salvage Committees. From these committees, the government will purchase the rubber and also pay freight on carload and truckload lots.

The department stresses the fact that 87 per cent of all crude rubber in the world is produced in the East Indies, now controlled by the Japanese. Canada has a substantial stock of crude rubber but this is rapidly being used up in the manufacture of war materials. Not an ounce of this crude rubber is being used for non-essential purposes, the government says.

Since a ton of scrap rubber makes 1,500 pounds of reclaimed rubber, each pound collected is extremely valuable.

Tires, tubes, footwear, matting, hose, belting, toys, hot water bottles and many other articles contain useful scrap rubber. Crepe rubber soles are especially good, the government department says.

RURAL GASOLINE PUMPS CAN SELL SATURDAY NIGHTS

MUST CLOSE DOWN AT 9 P.M.
SAYS OIL CONTROLLER
COTTRELL

Ottawa, June 2.—Officials of the munitions and supply department today gave assurance to operators of rural gasoline stations that they may remain open on Saturday evenings even if they have not received personal notification to that effect from Oil Controller G. R. Cottrell.

Last May 21 the department said stations situated five miles or more from the limits of a city or town with a population of 5,000 or more could stay open Saturday evenings until nine o'clock—two hours after the closing time set by the gasoline regulations. The permission was granted as a concession to farmers.

"That statement," officials said today, "was based on an order issued by the oil controller and operators of rural stations can accept it as genuine."

The concessions to farmers only extends to the two-hour extension of gasoline station closing hours on Saturday. On other nights stations must close at seven o'clock as in urban areas.

Rifle Instructor: "Do you know what you are aiming at?"

New Recruit: "No, sir; I'm a stranger in this district."

Grocer: "Do you want white or brown eggs, ma'am?"

Bride: "The kind I want are white with a yellow polka dot in the middle."

Mr. Raymondite! The coming Stampede is your show. It is put on to advertise your town and district and the least that any of us can do to support it. Will you do your part?

North-West Line Elevators Association

Wheat Stem Sawfly Again

Last January we drew the attention of our readers to a Dominion Government circular entitled "Control of Wheat Stem Sawfly." The Division of Entomology, Ottawa, has recently prepared a coloured map which shows the extent of sawfly infestation in the prairie provinces. The colours on the map are very bright; but the prospect rather gloomy. Sawfly is present over an area bounded by a line extending from the international boundary approximately through Winnipeg, Kamnick, Prince Albert, Edmonton, Calgary and Cardston. Obviously this leaves a comparatively small proportion of our wheat growing area entirely free from infestation.

On the back of the sawfly map will be found a summary of the problem and brief descriptions of control measures. The following statement is made:

"Plans must be made immediately to start sawfly control on infested farms. No farmer who suffered loss in 1941 should continue farming without recognizing the problem and taking steps to reduce the loss caused by this insect."

In order to consult the sawfly map and information provided therewith, farmers have only to call on grain buyers in any of the line elevators associated with the work of the Agricultural Department of the North-West Line Elevators Association. Grain buyers also have copies of the excellent bulletin, written by Dr. C. W. Farstad, to which reference was made in our January article.

For further information, write to the Dominion Entomological Laboratory at Lethbridge, Saskatoon or Brandon; or to the Department of Agriculture, Edmonton, Regina or Winnipeg.

HERE'S A LOW COST PLAN TO...

help
your studies!

A New Valuable TOOL IN EDUCATION

Recent tests, conducted by prominent educators, have shown parents, educators, and students that the portable typewriter is a most valuable educational tool. In a dramatic two years series of tests they have proven that most children improve grades as much as 14% when using a portable typewriter. An unexpected outcome was that, in addition to betterment in Composition, Geography, History, Science and even Arithmetic, self expression became easier even for shy students! You, too, can have this marvelous educational aid—for Remington Rand makes it easy to get! Only a small deposit, and terms as low as 10c a day, will bring you the Remette Portable, other models a trifle higher. Read what prominent educators say about student use of typewriters. Send for Free Booklet.

Remington REMETTE PORTABLE

Lowest priced complete standard portable in Canada. Full standard keyboard, shift keys, shift lock, back spacer, margin stops. Extra strong geared type action, nothing that can get out of order. Full mechanical guarantee. You'll be thrilled when you see how easy it is to type with the Remette Portable.

FREE! TOUCH METHOD INSTRUCTION BOOK

with any Remington Portable you buy. It contains lessons, exercises, charts and illustrations to help teach you typing by the touch method.

SPECIAL CARRYING CASE

Included in the purchase price of your Remington Portable is a specially designed Carrying Case.
